Good afternoon all Mhlontlo communities

Our country is under attack from the killer disease called corona virus 2019. Subsequent to its arrival, President Cyril Ramaphosa declared state of emergency where he said all gatherings should not exceed 100 people, introduced social distancing, continuous washing of hands, wearing face masks and sanitizing hands but not limited to that. But after that, the rate of infections increased very high in South Africa and it became uncontrollable spreading like veld fires.

President then declared a LOCKDOWN that started on 26th March 2020, South Africa went into a 21-day lockdown. It will last until midnight on the 16th April 2020.

That meant three weeks indoors, except under exceptional circumstances like buying food, visiting Dr or pharmacy, visiting banks and all essential services are operating like security cluster, water units, electricity units and health officials amongst other things.

All of us must know that it is illegal to hold gatherings and church services, these are introduced for the benefit of our congregations in particular masses in general.

This COVID-19 is real and let's comply so that we save innocent lives.

As things stands we are inspired as the leadership of Mhlontlo with response of our masses to this pandemic disease and we acknowledge a good work that is performed by SAPS, SANDF, all sector departments in particular health department, traffic officers both provincial and municipal ones, and volunteers.

Furthermore, we are impressed with the role that is played by traditional and religious leaders of Mhlontlo, they are visible on the ground doing door to doors preaching about importance of conforming with WHO guidelines.

We are calling upon all those who live in Mhlontlo to continue respecting the call by the President of the republic and WHO guidelines so that we save the lives of our people. This disease is real and it can infect anyone black and white with no age restrictions.

I thank you!

Cllr Nompumelelo Dywili

Mayor- Mhlontlo Local Municipality
